

1. Central dogma of molecular biology

(1)

- What does it mean to add a phenotype?
- Change in observable phenotype of the organism in population
 - Gene doesn't directly lead to phenotype
- ⇒
- | Gene | Phenotype |
|----------------|-------------|
| 1. 100% wild | 100% wild |
| 2. 100% mutant | 100% mutant |
